Agenda:

Work place
Security Trends during COVID-19
Security / Monitoring issues
Things to remember
Tools available
Conclusion

Working in office is no more option

Work place changed: What we need at home ?

- A private room

- High speed Internet – 10 mb or more

- Computer / Laptop & Tablet/phone

- Access to office PC

- Access to office Server

- Access to payroll / accounts etc

- Access to SVN/ GIT / Source control etc

- Communication with Team members

- Daily reporting / timing

Security Trends

New challenges / issues / attacks

- Surge in inexperienced remote workers – more cyber security risks
- Phishing emails and messages in the name of boss
- Malacious Cyber Actors
- Malware App – COVID19 app etc
- Test Free with symptoms to steam data
- Emonet Trojon – Spam - files /script/ mactro
- Agent Tesla – clipboard – encrypt and send
- RAT – Remote access Trojon
- Coronavirus map

Security / Monitoring

Be Aware..

- Unsecure wifi password
- Hotspot / Internet shared
- Sharing of PC / remote access
- Access to office / VPN
- Remote desktop
- Security of Code
- Attendance / logging
- Watchman / Electrician at office

RAJASTHAN

FOSTERING ENTREPRENEURSHIP

Essential Movement

In case of emergency

- Deciding the person
- Arranging vehicle
- Government permission
- Vehicle Permission
- Health Monitoring
- Security
